Operation in 3 simple steps

- ✓ Set the rotary dial to your testing range.
- ✓ Connect the instrument to the installation under test.
- ✓ Press the test button.

Hands free testing

By remote probe or using the Lockdown function of the test button.

Large LCD

All the test data is shown in one large colored screen.

Anti-Trip Technology (with 2 & 3 wires)

For no trip LOOP L-PE testing on all RCDs.
With 3 wire (L, N, PE), to get the best accuracy readings.
With 2 wire only, very useful in case of no Neutral (i.e. 3-phase motor lines).

HELP Key

HELP function will show how to connect the instrument according to the function selected.

0.001 resolution

Thanks to high test current of 25A, the Loop Impedance Phase to Earth is measured with high resolution of 0.001 ohm. This can be useful when testing in the main switchboard closer to the transformer.

Loop test from a wall socket

Continuity check of equipotential bonding

Testing Power in the hands of Electrical Installation Professionals!

Wide variety of RCDs can be tested

Type AC, A, F, B (General & Selective) EV and Variable RCDs. Single and Auto test, Ramp test and Contact voltage.

x5 8.4ms	18.0ms	
	230.4V	
	50.0Hz	
	L-PE L-N	
AUTO	30mA	TYPE AC

SPD test

SPD (Surge Protection Device) which contains varistor can be tested measuring the tripping voltage without damage it.

PAT test

PAT test (PAT = Portable Appliance Tester) It is possible to check the insulation resistance and earth bond continuity of portable appliances for class I and II.

Zs/Ra Limit

LOOP ATT.		12/11/2019 16:17
Zs Limit: <2.87	Prot.: MCB B	
	In: 16A t: 0.4s	
	0.21 Ω	✓
PFC	1112 A	230.7V
L-N	0.05 Ω	50.0Hz
PSC	4.75kA	
L-PE 3W	Pulse ON	Limit

The verification of safety requirement on an electrical installation is simplified by using Zs/Ra Limit function. This function will automatically check if the measured loop impedance for TN (or earth loop for TT) is low enough to trip (disconnect) the MCB / Fuse / RCD giving the result of PASS(✓) or FAIL (x) on the display.

Connectivity

KEW 6516 can download the test data by connecting the USB adapter (MODEL 8212-USB) and then print complete Test Reports by a PC. While Kew 6516BT can transfer the test data to a Tablet or Smartphone via Bluetooth®. Such test data can be saved, shared and sent by email. The USB adapter can also be ordered as an option.

KEW 6516 and Kew 6516BT come complete with everything you need for testing an electrical installation
